

Year 5 Primary & Preventative Care Feedback Questionnaire 2025-26

* Required

Message from Professor Kathy Cullen, Director, Centre for Medical Education

Constructive feedback is an important professional skill for all doctors. As a medical student it is important that you give your constructive feedback in relation to both University and hospital teaching. It is also important that you engage initially with staff on site in relation to any concerns you may have during your placement as that is the best way of getting your issues resolved.

The Centre for Medical Education has issued guidance to all students on Raising Concerns. The Guidance and link to an on-line reporting form is available on the Medical Education Portal under Professionalism <https://www.med.qub.ac.uk/Portal/prof/concerns.aspx>

At the end of this questionnaire there are a number of free text questions if you wish to alert CME staff to any particular issues.

Message from the Student's Union

Evaluation of lecturer/tutor and module questionnaires are an important feedback mechanism for students. The results from the questionnaires are used to contribute to enhancing the quality of learning and teaching across the University. It is therefore important to fill these out honestly and constructively. It is important not to make derogatory and/or discriminatory comments about individuals.

Challenging Exclusions

The evaluation survey has been adapted to include questions on how inclusive students found their placements to be in terms of the environment and interactions with teaching and other staff, patients and students. These questions are designed to identify issues in a timely manner. We would also encourage students to report instances where they have felt excluded and discriminated while on placement to relevant staff or using the Centre for Medical Education's Raising Concerns form (<https://forms.office.com/Pages/ResponsePage.aspx?id=6ner6qW040mh6NbdI6HyhslWzjirg5xJviBrtjBxNMJUMkFKSDc2NUYzWVEzQIM0MVcxUEtRRTFNSS4u>) or Anonymous Reporting systems.
